OPEYEMI ADEGBOYE

SOFTWARE ENGINEER | FULLSTACK DEVELOPER | MOBILE DEVELOPER
Lagos State
adegboyeopeyemi580@gmail.com
+234 811 013 0288

With over 6 years of experience, I'm a Full Stack Developer adept at crafting dynamic applications using cutting-edge technologies.
My expertise spans front-end frameworks (ReactJS, AngularJS, Flutter, React Native) and back-end technologies (Node.js, Express.js, Next.js, Django). I've honed my abilities to create responsive user interfaces and robust backend systems.
Throughout my journey, I've mastered databases (MongoDB, PostgreSQL, MySQL) and cloud deployment on platforms (Azure, Google Cloud, AWS).
My proficiency extends to version control systems (Git, SVN), demonstrating my commitment to delivering efficient and innovative solutions across diverse technology stacks.

Personal Details

Highest Level of Education: Undergraduate
Industry: Information Technology, Software Development
NYSC Status: Not Applicable

Work Experience

Fullstack Developer

Vsured Limited - Lagos
January 2024 to Present

• Developed a mobile application using React Native and Native Wind, integrating APIs to enable seamless user experiences across iOS and Android platforms.
• Created a dynamic web application utilizing React, Tailwind CSS, and integrating RESTful APIs developed with Node.js, ensuring responsiveness and intuitive user interfaces.
• Employed agile methodologies to collaborate with stakeholders, gathering requirements and iterating on features to meet business objectives effectively.
• Contributed to the development and maintenance of RESTful APIs on the backend using Node.js, ensuring robust and scalable architecture.
• Engaged in the testing, deployment, and continuous maintenance of software applications, ensuring stability and functionality throughout the development lifecycle.
• Utilized CI/CD tools such as Codemagic for automating the build, testing, and deployment processes of mobile applications to Firebase for Android and TestFlight for iOS platforms.
• Implemented modern design patterns like MVVM (Model-View-ViewModel) to enhance scalability and maintainability of mobile applications.

Full stack / Mobile Developer

Pearmonie - Lagos
December 2022 to January 2024

As a former Fullstack Developer at Pearmonie:
• Leading and managing a team of developers, ensuring effective communication, collaboration, and project delivery.
• Creating a mobile application using Flutter, providing a seamless and engaging user experience across iOS and Android platforms.
• Building a web application using Next.js and React.js, leveraging server-side rendering for optimized performance and SEO.
• Implementing Continuous Integration/Continuous Deployment (CI/CD) pipelines for the mobile application using Codemagic, automating build, test, and deployment processes.
• Managing the deployment of mobile applications to both the App Store (iOS) and Google Play Store (Android), ensuring compliance with platform guidelines and regulations.
• Conducting code reviews to maintain code quality, ensure adherence to coding standards, and promote knowledge sharing among team members.
• Developing robust and scalable RESTful APIs using Django, focusing on performance and security.

Fullstack Developer

Yashe - Lagos
July 2023 to September 2023

• Leading and mentoring a team of developers, fostering collaboration and ensuring successful project delivery.
• Designing and implementing RESTful APIs using Next.js, Nodejs and PostgreSQL, focusing on scalability, performance, and maintainability.
• Developing frontend applications using React.js and Tailwind CSS, creating intuitive and responsive user interfaces.
• Integrating frontend applications with backend APIs to enable seamless data flow and functionality.
• Setting up Continuous Integration/Continuous Deployment (CI/CD) pipelines for both frontend and backend applications, streamlining the development process and ensuring rapid deployment.
• Conducting code reviews to maintain code quality, enforce best practices, and facilitate knowledge sharing within the team.
• Collaborating closely with cross-functional teams including design, product management, and QA to deliver high-quality software solutions that meet business requirements and user needs.

Full Stack Developer

SmartTeller - Lagos
November 2022 to June 2023

As a former Fullstack Developer at SmartTeller:
• Crafted dynamic user experiences with HTML, CSS, JavaScript, React, and Angular.
• Developed robust APIs using Node.js and Django.
• Built adaptable web apps for diverse devices.
• Optimized databases with MySQL, PostgreSQL, and MongoDB.
• Transformed wireframes into interactive UI/UX designs.
• Enforced code quality via Git and code reviews.
• Conducted thorough testing to resolve bugs.
• Enhanced app functionality with third-party APIs.
• Adhered to Agile practices for effective project management.
My focus was on delivering impactful applications that contributed to SmartTeller's success.

Fullstack Developer

NoviService - Cagliari, Sardegna

January 2020 to October 2022

During my time as a Fullstack Developer at NoviService in Cagliari, Italy:
• I crafted captivating user interfaces using HTML, CSS, JavaScript, React, Angular, and Vue.js.
• With backend skills in Node.js and PHP, I engineered APIs and databases.
• Spearheading RESTful APIs, I optimized performance for seamless data exchange.
• I prioritized user privacy by designing secure authentication protocols.
• Transformed mockups into interactive web apps, collaborating closely with UI/UX designers.
• Rigorous unit tests ensured application reliability.
• Third-party APIs enhanced app functionality.
• Agile methodologies streamlined project management.
My role at NoviService delivered user-centric web apps, contributing to company success and user satisfaction, while Angular experience enriched my versatility.

Nodejs Developer

KidsTech Africa - Kwara State

November 2020 to June 2022

In my role as a Full Stack Developer and Lead Instructor at KidsTech Africa:
• I blend tech expertise with mentoring young minds.
• Empower kids to embrace coding and tech.
• Encourage creative problem-solving through project-based learning.
• Spark curiosity and critical thinking.
• Foster a positive, inclusive learning environment.
• Build strong tech foundations for the future.
• Continuously update Full Stack skills.
• Serve as a role model for adaptability and learning.
I find joy in nurturing tech enthusiasts and advancing in technology simultaneously.

Fullstack Developer

Digprom international - Kwara State

July 2019 to January 2022

At Digprom, I'm not only a Full Stack Developer but also an instructor, introducing young minds to the world of technology.
My role:
• Seamlessly handles frontend and backend using Node.js and React.
• Leverages Node.js and React's power for robust applications.
• Integrates blockchain features, enhancing security and transparency.
• Contributes to decentralized applications via smart contract development.
• Excels in end-to-end development from idea to deployment.
• Ensures smooth communication through Node.js APIs.
• Focuses on user-centric UI/UX and efficient backend data management.
• Thrives in agile collaboration and continuous learning.
• Nurtures young talent, introducing them to the world of tech.
At Digprom, my dedication to innovation, combined with my role as an instructor, drives project success and company growth.

Education

200 Level in Undergraduate
National open university of Nigeria - Kwara State
Present

Skills

- Methodologies: Agile TDD (Test-Driven Development) , CI/CD (Continuous Integration/Continuous Deployment)

- Webservices: REST, SOAP

- API Tools & Editors: Airtable, Postman, Ready API, Swagger.io, REST Assured, Katalon Studio, Visual Studio Code (Vcode), Sublime Text, Atom Editor, Notepad++, NetBeans, Brackets, Android Studio

- Web Technologies: HTML, CSS, JavaScript,Next.Js Node.js, ReactJS, Redux, React Router, AngularJS/ Angular, NPM (Node Package Manager), jQuery, Ajax, JSON, Express.js, Hapi.js, Python

- RDBMS (Relational Database Management Systems): MySQL , Oracle and PostgresSQL

- CI/CD: Jenkins, Jira and Ansible

- Server and Cloud Services: Digital Ocean, AWS, Azure, Linode, Vercel, Google Cloud, Cloudflare Workers, AWS Lambda, IBM Cloud, GitHub, LastPass, Salesforce

- Mobile Technologies: Flutter, React Native and Ionic

- Architecture: REST, Microservices, Distributed, MVC (Model-View-Controller), MTV (Model-Template-View), MVVM(Model-View-ViewModel)

Languages

- English - Fluent

Certifications and Licenses

Flutter Advanced Course - Clean Architecture With MVVM

Present

This course on Flutter has elevated my skills to that of an experienced developer. I've learned the art of cross-platform development, utilizing a single codebase for Android, iOS, and desktop applications. The emphasis on project structuring has made my code more readable and maintainable. The course deep-dived into implementing clean architecture with MVVM, covering presentation, data, domain, and application layers. I gained practical experience with a real project, honing my ability to code from scratch. The principles learned, coupled with best design practices, empower me to create stable apps amid changing external elements. The course concludes with the ability to reuse source code professionally, customizing it for clean architecture projects.
